

Are you looking to innovate and grow your business? Government Incentive Programs and Grants may help you.

At Brooklin Consulting, we work with industry leaders to help them overcome their unique business challenges, uncover their greatest opportunities, and achieve impactful results.

With over 30 years of experience across a wide range of industries, we can help you acquire government incentives to offset costs and fuel your growth. Based on your business location, industry, size and structure, we can recommend a portfolio of programs to maximize the returns on your investment.

Benefits to your company

Your company can receive between 15% to 50% of your project budget with awards ranging from **\$50,000** to **\$400,000** and up.

Projects can be multi-year or single-year with flexibility to meet your operational and business growth costs. If your company is implementing any of the following activities, then a grant may help you.

- Product and service innovation
- Technology innovation including green technology
- Capital acquisition
- Job growth including hiring and training new and incumbent employees
- International and domestic expansion

How we do it

Our multi-pronged approach ensures each stage of the grant application process is completed efficiently.

Funding consulting - we source and curate a list of relevant programs to maximize your ROI. We will meet with your team to discuss your project, its goals and objectives, and work to apply for one or more programs to offset as many costs as possible.

Application development - we prepare and complete applications, including performing market research and advise on key performance metrics to ensure your proposal is data-driven and competitive.

Tracking and monitoring - we track and monitor each application as it undergoes the government's review process. We will work with your team to respond to queries and requests for additional information.

What matters most: results

Our projects are tied to clearly defined improvements. Here are some of the awards our clients have received:

- **\$400,000** on equipment and domestic facility expansions
- **\$35,000** to **\$100,000** to train employees
- **\$50,000** to **\$75,000** attend international trade shows

What our clients have to say

We are proud to have supported our clients.

"We have been thrilled with the services the team has provided us. If there are government grants that are available to help you, Brooklin will find them."

Begin your journey

The grant process starts by meeting with your team and learning about your goals and objectives.

We will work with your team to provide funding strategies for each stage of business growth, concept to commercialization and international expansion.

Contact us for a consultation at no charge. Let's connect and make a positive impact together!
